updated 25. 4. 2024 | published 25. 4. 2024

Summary

Because we all need more hexagons!

The Frame Braces you all know and love But now with Hex's!

These exactly the same size as my previous “door stabilisers” found here <https://www.printables.com/model/508931-voron-0-01-02-door-stabilizers-two-magnet>

but with some visual tweaking to make form fit function.

Taking design ques from the V0.2 skirts these will add that little bit more Voron to you Voron!

i've laid two frame braces on a V0 bed so just download, slice and print!

UPDATE

V1 = regular

V2 = beefed up mounting points

please follow the Voron Print Settings

4 perimeters

5 top / bottom layers

40% infill

material - ABS / ASA

feedback and makes are always welcome!

Happy printing!
